

AR DELTA 61 AR GLASS FIBERS

Raw material: Colour: Standard length: Storage: AR Glass fibers white 12 mm store in a sheltered and dry area

Packaging:

Individual packaging	Kg/carton box	Kg/Pallet
Loose Fibers	20	900
1 Kg bag	20	900

Main application

Cement-based slabs and floating slabs.

Advantages

- resistant against alkalis of cement and demonstrable for a long time in the slabs
- they disperse homogeneously don't build "balls"
- fibers don't come on the surface
- they reduce early shrinkage cracking
- they don't rust and corrode
- the price is lower than other AR glass fibers

Instruction for use

Fibers can be mixed together with concrete directly in the factory (in the mixer or transit mixer while filling cement) or at the building site as well. AR DELTA 61 doesn't need a prolonged mixing time and distributes homogeneously in the mixture.

AR DELTA 61 doesn't affect the workability of the slab and the W/C ratio.

Suggested dosage: $1 - 3 \text{ kg/m}^{3*}$.

We suggest carrying out proper tests in order to find the best dosage for your mixture.

* Attention All data reported can only be considered as general indications. In case of different conditions of work and materials we suggest doing proper tests. A guarantee can be given only for the quality of our product.
